Yes, good clarifications. Apparently we really need to drive this point home!

**Subject:** RE: BAP Question

Maybe I'm reading too much into her question, but some additional clarification could be helpful at this point...

OMG.

So I was thinking of writing something like this:

## Ex. 5 Deliberative Process (DP)

Other thoughts?

Thank you! Also, people want to know of the RfC and RfD should be used as surrogates for the other PAHS?

**Subject:** BAP Question

Hi Kathleen,

A colleague in Region 2 asked whether the Relative Potency Factors for PAHs can be applied to the non-cancer Reference Dose for Benzo-a-pyrene. I was not able to locate a recommendation on this issue in the draft IRIS assessment. Kindly let me know if there is a specific recommendation for the application of Relative Potency Factors for PHAs.

Thanks for your help.

Marian
